2014 美国文理学院校园种族多样化排名

《美国新闻与世界报道》(U.S. News & World Report)于 2013 年 9 月 10 号发布了 2014 年度美国大学排行榜，中广国际教育第一时间整理分享给申请 2014 美国大学的学生和家长们参考。

College-bound students who believe that studying with people of different racial and ethnic backgrounds is important will want to consider student-body diversity when choosing a school. To identify colleges where students are most likely to encounter undergraduates from racial or ethnic groups different from their own, U.S. News factors in the total proportion of minority students, leaving out international students, and the overall mix of groups. The data are drawn from each institution's 2012-2013 school year student body.

The categories we use in our calculations are Black or African-American, Hispanic, American Indian, Asian, Pacific Islander, White (non-Hispanic) and multiracial. Students who did not identify themselves as members of any of those demographic groups were classified as whites who are non-Hispanic for the purpose of these calculations. Our formula produces a diversity index that ranges from 0.0 to 1.0. The closer a school's number is to 1.0, the more diverse is the student population.
